## COUNCIL INVESTIGATES POLICE CHARGES

Long Session as Committee of the Whole Hearing Evidence  
in Charge Against Chief Dean.

The city council met last evening in special session and immediately resolved into committee of the whole to hear the evidence in the charge made against Chief of Police Dean by F. Novark.

### THE COMPLAINANTS STORY.

The complainant who is a Bohemian spoke English with difficulty and had to be helped out occasionally by interpreters. He said he had been in Edmonton about three months since and in the St. Elmo hotel. He had lost a purse containing a sum of money in the window of his room at the St. Elmo and went down stairs for a few minutes. This would be about 11 p.m. He had previously counted the money. There were 16 one dollar Bank of Montreal bills and one five dollar bill. When he returned to his room he missed the purse. He told Simerad the proprietor of the house and Simerad went outside where he met Chief Dean. Witness looked about the yard for the purse while Simerad and another man looked in his room. He last saw the money in the fire hall when Chief Dean asked him how much he had and after being told \$165 counted him out \$140 saying this was all. The chief then took him outside the hall and demanded \$10 for recovering the purse, witness refused but agreed to give him \$5. Gave Dean \$10 bill and he gave him only \$4 back. He then returned to the St. Elmo and was told by Simerad and others to count his money, did so and found only \$114. This was about 10:30 or 11. Was not in the bar after returning to the hotel. Received \$15 more from Simerad when he

returned a week later, which Simerad said had been left for him by Dean. At first refused this as he wanted \$45 but finally accepted it. Had never spoken to Dean about it since.

Cross examined the complainant said it was about 11 p.m. when he discovered his loss, had got the money at the Bank of Montreal the day it was lost, had recovered the purse during the same night as lost, had been out half an hour when he left purse in window, no one in room when he went out, door not locked.

Cross examined by the defendant, plaintiff said he had just spoken to Dean in office of St. Elmo, next in fire hall, had not spoken to him on the corner at the Great West buildings. Simerad told him the money was in the fire hall, had tried to lay information against Dean some time since, did not know T. P. Cai ney.

### SIMERAD'S EVIDENCE

C. Simerad, proprietor of the St. Elmo, gave evidence next. On the night of Nov. 7th after closing the bar he met Novark in the hall who said he had missed \$165, thought it had been lost around the house. He took Novark and one Roll to Novark's room and saw Novark get on his knees and look under the bureau. Witness started for fire hall and met chief Dean and returned with him to hotel where Dean questioned Novark in the office. Talk became so loud he had to ask them to stop. Thought Dean the worse of liquor. Dean started for fire hall and Novark went out. Witness and Roll went to Novark's

## THE DOG QUESTION

A resident of the east end of the city writes the Bulletin in no very amiable mood complaining that he has been severely bitten by a dog and propounds the query as to whether the canine population of the city be not too numerous.

The Bulletin is disposed to agree that the number of dogs in the city is somewhat in excess of the requirements of the case. The trouble is an old one and has been the subject of serious consideration public and private in years gone by. The fact is that the number and variety of its dogs has for many years been a distinctive characteristic of the city. Some time since the supply was considered to exceed legitimate demand for watch dogs and pets and an attempt was made to reduce the surplus by the imposition of a fairly high dog tax with a proviso attached that sudden extinction should befall any resident puppy whose collar was not ornamented with a city tag by a certain fixed date. The tax was the means of ascertaining the ownership of a large number of dogs and putting a considerable sum into the municipal treasury. But when the chief of police was sent gunning for the unlicensed and vagrant along the streets and alleys of the town the feelings of the merciful were stirred and many and caustic were the opinions of the legislative wisdom of the council and the marksmanship of the chief. The arrangement was found satisfactory neither to the council, the chief, the public nor the dogs.

This scheme was abandoned and a dog pound established on the corner of First street and Naimao avenue, where the scavenger was instructed to convey all vagrant poodles captured within the city limits. Armed with a lasso and a hen-coop this gentleman began his labors and after a few days success had so crowned his efforts that the pound was filled with a score of howling, fighting canines of all ages, sizes, nationalities and dispositions. These were to be detained a certain number of days and if not reclaimed would go the way of the transgressor. But in the meantime trouble broke out. The guests and management of the Alberta hotel, in the same block as the pound, wrote the council that the long stilly watches of the night were made hideous by the battle cries of the prisoners, farmers wrote that their dogs having followed them into town were seized and unlawfully incarcerated, the citizens for blocks around protested that sleep was impossible in the vicinity, and the dawn of a summer's day revealed a broken door and a vacant pound. An un-

## Three Months of Steady Cold Weather

If it was to last only a few days or weeks, then any kind of a Heating Stove would tide you through, but for a long spell of cold weather where you need your house warm night and day there is no Stove on the market so well adapted for heating as the

## "Riverside Oak"

It will heat two rooms at once. It has a hot air pipe attachment and it will take the cold air from the floor, heat and distribute it into any room the Hot Air Pipe is carried into, without burning any more fuel. It burns equally well Coal or Wood and the price is very low considering its efficiency and economy.

Ross Bros. Limited have handled this Stove for a long time and can conscientiously recommend it as sure to please. Have you seen the New Steel

## Monarch Range

guaranteed all Steel and Malleable Iron. The top of this Range is ground to a finish, just the same as a Fry Pan or Kettle and can be used for Frying and Toasting just the same as a French Top Range. The Ovens are the most uniform of any Ranges made. The water fronts are so modelled that they will heat twice the water of an ordinary Range. It burns either Wood or Coal equally well and will heat up quickly and on a less quantity of fuel than any other range made.

### See the One in our Window

they are beauties and the price is not so high as you would expect to pay for so good an article. We keep everything in Kitchen Utensils and truly think we can give you better value than any other House in the West.

## Ross Bros.

Ltd.

### THE DOG QUESTION.

Continued from page 2.

wanted silence brooded over the neighborhood and told the thankful residents that the noisy birds had flown.

The pound, was removed to the nuisance ground but the regulations were unaltered and the custodian of the city scavenging arrangements could tell the story of the tragic end of many an ownerless and friendless cur.

But even these drastic measures have made no noticeable decrease in the visible supply and with apologies to Longfellow it may be said

There is no shack however small  
[and wretched]  
But one fat dog is there;  
There is no fireside how soever  
[splendid],  
But hath its flea-bit cur.

### PUBLIC HOSPITAL MATTERS.

The annual meeting of the Edmonton Public Hospital was held in the Council Chamber of the city hall on Friday afternoon last. Mayor MacKenzie occupied the chair, and A. Butchart acted as secretary. Over thirty were present.

The Director's report and the financial report, both of which have appeared in a previous issue, were read and adopted.

The secretary of the W. H. A. Society also read the report of their society and a motion adopting it and extending a hearty vote of thanks to the ladies was passed.

The following were elected on the Board of Directors for the ensuing year:

Rev. A. M. McDonald, Prof. J. H. Riddell, K. W. McKenzie, John A. McDougall, W. T. Henry, A. T. Cushing, G. F. Kirkpatrick, E. C. Pardo, T. M. Turnbull, J. E. Mills, and Messrs. R. Manson and F. Ross.

A hearty vote of thanks was passed to the retiring directors.

The Board of Directors met on Saturday afternoon to organize.

Mr. J. A. McDougall was elected president, T. M. Turnbull Hon. Sec. Treas. and A. Butchart acting Sec. Treas.

The regular meetings of the Board will be held in McDougall & Secord's office on Jasper Avenue, next door to the Customs office on the second Monday of each month at 8 p. m.

Messrs W T Henry and A T Cushing are the hospital visitors for the month of February.

This year the matter of soliciting individual subscriptions will be left to the ladies of the W. H. A. Society who will make a thorough canvass of the city and surrounding territory.

### NO CITY POUND.

The city pound—or lack of pound is once again in the front. The stable keepers who have heretofore kept the pound have declined to continue to do so and several animals sent thither were refused admission. The city at present is without a pound or a pound-keeper and several complaints have been made during the week by farmers whose loads of fodder have been damaged by cattle on the market square.

### ADDITIONAL SALARY LIST.

In the list of salaries paid permanent employees presented to the council last week the salaries of the employees of the telephone system were not included. These are as follows:

Manager, per year.....\$900.00  
Edmonton Central Operators  
per year.....1,200.00  
St. Albert Central Operators  
per year.....600.00  
St. Albert Central Operators  
per year.....120.00  
Line men employed about half  
time at 25c per hour.....\$47.50

This brings the total amount paid annually to permanent employees up to \$26,267.50.

The central at Fort Saskatchewan is conducted on a commission basis.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

**Coal.**—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

**Quartz.**—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for mining locations.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$750 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500 by 1500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office. One additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 100 acres.

The patent for a mining location shall provide for the payment of

royalty on the sales not exceeding five per cent.

**Placer Mining.** Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar, diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each, for a term of ten years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles, or fraction, will be sufficient. Rental, \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

**Placer Mining in the Yukon Territory.**—Creek, gulch, river, and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of a mining recorder's office. One extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two or more, each shall be entitled to a claim of 500 feet. The output of which no royalty shall be charged, the rest of the party's primary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$2. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

**Hydraulic Mining.** Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent, is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted.

A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unoccupied land for agricultural and building purposes.

**Petroleum.**—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 400 acres. Should the prospectors discover oil in paying quantities, and satisfactorily establish such discovery as an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

COUNCIL INVESTIGATE POLICE  
CHARGES

Continued from page one

room and found purse on the floor under the window. They went to the hall and gave the purse to Dean, without opening it. Dean counted the money and gave him a receipt for \$140.55 which he thought was all the purse contained. Witness forced Novark at hotel. Took him to the hall where Dean gave him purse and again counted the money, the same amount. Novark protested that he had more than this. Dean took Novark outside. Constable Tidbury came in. Dean returned and showing a \$5 bill said it was Novark's and he would blow it. Next morning Dean gave him \$15 to give Novark. Dean told him he had been drinking the previous evening. Dean had afterwards told him that Novark had said witness had stolen the purse.

Cross-examined by defendant witness said he had nothing to do with liquor seized at a house in the east end some time since. Did not remember telling Dean there was a \$5 bill in the purse.

## CONSTABLE TIDBURY

Remembered entering fire hall about midnight 6th or 7th November and Dean and Simerad were talking and Dean showed \$5 intimating that it belonged to some third party. After Simerad went away Dean showed him \$10 more which he said belonged to some party and said he had retained the \$15 as he thought there was crooked work and he wanted to get at the bottom of it. Thought Dean had been drinking but was not drunk.

## JAS. CAMERON

Bartender at the St. Elmo; corroborated Simerad's story of Dean leaving \$15 at the hotel for Novark. Dean had told Simerad he had been drinking the previous evening. Cross-examined by defendant, witness said he had been given 24 hours to get to work or leave town, some time since.

## W. H. COUGER

Had been in St. Elmo two or three months ago when Dean and Simerad were in conversation. Heard talk about fifteen dollars and saw money on the desk which he gathered was to be given to someone else.

## CONSTABLE McCALLUM.

Was the only witness called by the defence. On Nov. 7th he met the chief who told him he had been at the St. Elmo where he had left some money for a man which he had held back to find out some crooked work which he suspected.

On Dec. 27th T. P. Cairney had told him he had a warrant for Chief Dean and was going to put him behind the bars. Thought chief had liquor in him on Nov. 8th.

## CHIEF DEAN

On November 8th was on his way home early in the morning when met by Simerad who said a man had lost some money at the hotel, he went and found Novark in the office, he questioned him but could get little information from him. Novark left the hotel and stood at the corner of the Great West building until he came along. Told him Simerad had stolen his money, while he had been asleep in a chair in the hotel. He had been awakened by someone at his pockets and found Simerad near by. Witness and Novark walked to the fire hall and Dean went in telling Novark he would see him next day. Simerad and a stranger came in shortly after and Simerad gave him the purse, saying he did not know how much was in it and had not opened it. The witness opened the purse and took out a roll of bills when Simerad said there was a \$5 bill in the purse. This aroused his suspicions and he resolved to lay a trap for Simerad. He hid the five dollar bill and told Simerad there was no bill of that denomination in the purse. He took out ten more. Simerad brought Novark and witness gave him \$140.55, keeping \$15 in the hope that it would lead to some information leading out which would give him a clue and went out on a platform with Novark, who twice offered him a reward of \$5. He refused twice but afterwards found that amount in his coat pocket. Novark seemed satisfied. He returned to the hall and showed Simerad and constable Tidbury the \$5 he had kept from the purse. Afterwards showed Tidbury the \$10 also telling him that he suspected crooked work and kept it as a bait as there had been many complaints against the St. Elmo. He met constable McCallum next day and told him he left \$15 with Simerad for Novark. Simerad told him sometime later that Novark had called but refused the money, giving no reason for so doing.

Cross-examined, defendant said the plan had failed to work, as no information had been gained and as Novark had left town next day he supposed none was likely to come out. Denied having said he would blow Novark's \$5. Had drunk nothing stronger than beer on the day in question. Novark had been drinking but was not drunk. Simerad did not ask him to stop conversation with Novark in the St. Elmo. Admitted he should have taken a receipt from Novark.

## THE PLAINTIFF.

Mr. Bishop, counsel for prosecution, recalled Mr. Novark in rebuttal. He said he had never told Dean that Simerad had stolen the money. Did not promise to see Dean the following day. Was on good terms with Simerad.

This completed the evidence and the committee reported progress and the court adjourned.

## Sunlight Soap

is a scientifically made soap, the oils and alkali being perfectly combined. It will wash equally well with hard or soft water. No hard scrubbing or boiling of the clothes. Just rub a little Sunlight on the clothes and it does the cleansing.

Give Sunlight a trial

You may have your money back if not satisfied.

### TERRITORIAL SWINE BREEDERS MEET.

The annual meeting of the Territorial Swine Breeders Association was held recently in the office of the Live Stock Association at Calgary. This meeting was called to order by J. C. Turner, Calgary, who occupied the chair in the absence of the President, Dr. Harrington, of Lacombe. The report of the Secretary and Treasurer were adopted unanimously. The meeting then proceeded to the election of officers, which resulted as follows:—President, F. B. Harrington, V. S. Lacombe, Alta.; First Vice-President, U. E. Brown, Calgary, Alta.; Second Vice-President, J. A. Turner, Calgary, Alta.

Directors:—P. Talbot, M. P., Lacombe, Alta.; J. C. Pope, Regina, Assn.; J. B. Bright, Macleod, Alta.; A. B. Potter, Montgomery, Assn.; W. R. Adams, Moccasin, Assn.; Official Auditor, F. R. Exam.

The proposed Fat Stock Shows to be held in the Territories then came in for discussion and the following resolution was passed:—"That this Association desires to commend the Territorial Department of Agriculture for taking steps towards organizing fat stock shows in the Territories, believing that such action will result in great benefit to the swine industry of the West."

The Association recommended the Territorial department of Agriculture to provide classes in the fat stock shows for bacon hogs only and to give prizes for sows and barrows under nine months of age and nine months and over. It was also decided that the Association should offer grand championship silver medals and both the Eastern and Western Shows for the best bacon hog—any breed and age.

### FUR MARKET.

The McMillan Fur and Wool Company of Minneapolis give the following regarding fur prices in their circular of January 5th.

The warm weather all over the Northwest lasted until quite late and delayed trapping and consequently shipments. The latest date furs can arrive in New York and be included in the January London sales is January 6th and in a few days the report of the offerings will be known. The Hudson Bay Company sells its entire last years collection of Beaver and Muskrat in January, the balance of the furs in the March sale. The March sale is the most important, and the January next, of the four sales of the year.

There is great excitement in the fur market; at the same time the active demand is for only six kinds, any of the other articles the buyers do not want at all except at very low prices. Of the six desirable kinds, the most active are Mink, Skunk and Weasel, and prices have been forced up, particularly on Mink to a very high basis. Skunk, are not used extensively in this country and the demand is from Europe. They are already a little quiet and some of the leading buyers have dropped out of the market on account of the high prices. Unless Mink are going to be more fashionable than is anticipated, they may be pretty near the top but there is not much risk in buying them freely if they are bought conservatively, because they are not likely to decline, anyway not until after the March London sale.

Weasel considering their small size and that they previously were not wanted, even at low prices, are extremely high, and no one knows how long the demand will last.

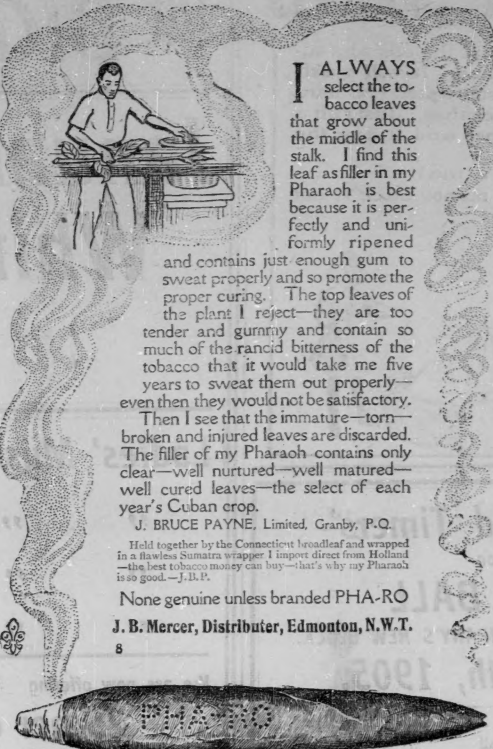

Beaver, Marmoset and Otter are in the next best demand.

Muskrat are in good demand but at low prices. No advance can be looked for until the Russian war is closed and that principal outlet is available.

Red Fox, Lynx and Wolf do not seem to be in demand at all. They seem to have gone out of fashion for driving and have already declined and if the demand does not improve they will go onto the low prices that Badger, Bear, Beaver, Wildcat and Gray Fox have.

Black, Silver and Cross Fox. The former are in demand at about present prices, but they vary all the way from \$50.00 to \$400.00, and very few command the outside price. Cross Fox is low, except the small proportion with a run thick or dark in color and good size.

Fisher, which is used for Russia, can be sold only at present low prices.

I ALWAYS select the tobacco leaves that grow about the middle of the stalk. I find this leaf as filler in my Pharaoh is best because it is perfectly and uniformly ripened and contains just enough gum to sweat properly and so promote the proper curing. The top leaves of the plant I reject—they are too tender and gummy and contain so much of the rancid bitterness of the tobacco that it would take me five years to sweat them out properly—even then they would not be satisfactory. Then I see that the immature—torn, broken and injured leaves are discarded. The filler of my Pharaoh contains only clear—well nurtured—well matured—well cured leaves—the select of each year's Cuban crop.

J. BRUCE PAYNE, Limited, Granby, P.Q.

Held together by the Connecticut broadleaf and wrapped in a flawless Sumatra wrapper I import direct from Holland—the best tobacco money can buy—that's why my Pharaoh is so good.—J.B.P.

None genuine unless branded PHA-RO

## THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining.—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment. The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta.

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era, as it often is.

In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In those early times when man was yet in his infancy so far as education and civilization goes, when life meant a continued struggle for the supremacy of the race, in short, when his best efforts were limited to an exertion which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but what is still more to the point, we have subjected this all-important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the construction of our largest buildings and it is daily becoming more popular. Again, our bridges, railroads, waterways, in fact all our great modern engineering feats and efforts would fail utterly were it not for the presence and the skilful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities not only would the commercial world be suddenly checked but we should gradually and surely drift backward to the starting point; the various branches of trade would have ceased, commercial enterprise would be a thing of the past and civilization would be a mere matter of history. Therefore viewing things from this, the only proper light, the logical conclusion we arrive at is that this twentieth century is the real iron age, the iron age of the past being merely the embryonic forecast of the world's great future. Such being the case let us turn to the material side of the case and ask ourselves the question "since iron is practically the fundamental basis of our modern civilization and since it is used to such a vast and ever-increasing extent, how is the supply to keep pace with the demand?" Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market at their present output. There is more demand than there ever was for a good iron mine, and this is especially applicable to certain countries and sections of countries.

Speaking of our own country—this vast Canada—with its limitless resources in the form of minerals, timber etc., here we have a young country, a growing country, full of great prospects and with a vast future. Unfettered by the fog and mists of uncertainty or incompetence she looms up before us in all her might. With outstretched arms she invites us to share her gifts and her future. Her downy is an ample one, nor does she withhold it from those who have the wisdom to know her charms. Her realm is of fine gold. Her ornaments are many and precious. Her will is of iron and as surely her will controls her actions so surely must her iron control her iron. With this iron she will build her railways, the Grand Trunk and the Canadian Northern, albeit in themselves a vast undertaking being but an earnest of future and of still greater enterprise. She must have all bridges, ships, machinery and the thousand and one other necessities which go to build up a large nation which she will surely one day become. Think of this to build up a nation! Great the expenditure, great the question "How are we going to obtain all this iron which is needed?" The answer is simple. Either Canada must include steel, or iron and by this we include steel, or the trust supply her own iron. Would we, knowing that we have fruit in our garden, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us pluck what we have ready to our hand, in other words let us take hold of the vast iron deposits which we know from the best authorities and can see for ourselves we possess. Let us work them, let us work them with work, throwing away money, but with careful consideration and with due regard to location, and the probable measure of success which such location promises.

There are those who would say that the average percentage of iron mines which are paying is small compared to the number of mines upon which large sums of money have been spent. Here again, notwithstanding

standing the fact that although the number of failures in iron mines has been far less than that of any other mineral, we find a class of people who rely rather upon their own ideas of what should be, than upon the advice of experts who deal with the things that are. Such is the class who would, after losing money by their own careless speculations, decry any form of mining; who, in short impede the march of progress.

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more then should he not take an active interest in building up his country by studying its natural resources and assisting to develop them?

It almost devotes upon us as a duty, which we owe our children and our children's children, this laying of the foundation stones of the future, and this being the age of iron it would seem that in that direction lies the work we have set ourselves to perform.

One naturally asks "where am I to start and how?" We will consider the first part of the query carefully, being guided by past experience and backed up by statistics, for these are the testimonies exacted from us by nature before she will yield up her stores in trust for future generations. Taking the iron belts on this continent of America we find that they have their defined limits and their directions as truly as the arteries in the human body. For instance if we find the brachial artery near our arm pit and run across it again at our wrist we may safely conclude that it is the same artery, or lead as it would be termed in military parlance. It is not our design to bewilder the reader or prospective investor with a list of iron mines, giving high dividends, nor do we sketch out a geographical chart of all the iron districts and leads on the American continent, but the following example will serve to show the well nigh infallibility of mining operations where carried out on the basis above illustrated. We refer to the world famed iron mines of the Mesabi range in Minnesota, U. S. A. Throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were far-sighted enough to invest in them. One particular case is that of a gentleman who now resides in the suburb of "Iron King" of Duluth. About twelve years ago he purchased eighty acres of timber land in the iron belt above named for the sum of \$300.00. After inspecting the timber he offered to sell his property for less than he had paid for it, but no one would buy it. Some two years after he discovered that the iron oxides exposed on his land were valuable, and he sold the right to take the iron off his eighty acres to the American Steel Corporation, charging them 25 cents per ton for all the ore they took. This has netted him \$8,000,000.00. His income from this source alone is \$750,000 per day.

Almost due north some 1000 miles from this Mesabi range lies an immense deposit of iron oxide, the property of the Edmonton Coal and Iron Company of Edmonton, Alberta, near Edmonton in Northern Alberta not far from the Canadian Northern Railroad and close to the route of the Grand Trunk Pacific, besides which it is within eight miles of the Saskatchewan river which is navigable, and is connected by wagon roads to Edmonton.

Amongst other experts, Mr. Wm. Blakemore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable, as it is more than likely from the character and occurrence of the deposits that the springs come from a stratified ore body below which could be developed by boring."

Alluding to a proposed expenditure of \$10,000,000 he adds: "Having had many years experience in locating and working various iron deposits, I have no hesitation in saying that this is available property and one which will justify the expenditure recommended."

The mineral deposits he finds by analysis consists of 45.2 per cent. of metallic iron from surface ore and as he further states, not only could it be used to produce an excellent steel oxide, for which a market could be found, but it could also be used in combination with other ores or smelting and iron and steel manufacture, similar to that so successfully smelted at the Red Lake ranges, Quebec province for many years.

Small wonder then that of late this valuable and immense property has created such a stir among mining circles in various parts, not only of this country but elsewhere.

For a Disease Germ That Liquozone Can't Kill.

On every bottle of Liquozone we offer \$1,000 for a disease germ that it cannot kill. We do this to assure you that Liquozone does kill germs. And it is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact which gives Liquozone its worth to humanity, a worth so great that, after testing the product for two years, through physicians and hospitals, we paid \$100,000 for the American rights. And we have spent over one million dollars, in one year, to buy the first bottle and give it free to each sick one who would try it.

### Acts Like Oxygen.

Liquozone is not made by compounding drugs, nor is there any alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is an absolutely certain germicide. The reason is that germs are vegetables.

and Liquozone—like an excess of oxygen—is deadly to vegetable matter.

Liquozone goes into the stomach, into the bowels and into the blood, to go wherever the blood goes. No germ can escape it and none can resist it. The results are inevitable, for a germ disease must end when the germs are killed. Then Liquozone, acting as a wonderful tonic, quickly restores a condition of perfect health. Diseases which have resisted medicine for years yield at once to Liquozone, and it cures diseases which medicine never cures. Half the people you meet—wherever you are—can tell you of cures that were made by it.

### Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

### 50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquozone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Liquozone costs 50c and \$1.

### CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to The Liquozone Company, 120-124 Wabash Ave., Chicago.

My disease is.....

I have never tried Liquozone, but if you will supply me a 50c. bottle free I will take it.

## LOCAL

—Train on time.

—The city council meet tonight.

—The News is the name of a newspaper established in Red Deer.

—The third hockey match for the Pederson cup will be played on Strathcona ice on Thursday evening.

—The license commissioners meet to-morrow to consider the application for license for the Gold Building house.

—Rees Bros. hockey team defeated a team from Mrs. Purches' boarding house last evening 5 to 2.

—T. M. Knarpen of the Western Canada Immigration Association addresses the Board of Trade in the council chamber tomorrow at 11 a. m.

—A hockey team has been organized in connection with the Imperial hotel and a challenge is extended to other hotels or boarding houses to play a friendly game.

—Regina Leader:—Whether Calgary ever gains what it so greatly covets, or suffers for violation of the Tenth Commandment, remains to be seen, but it will require all the forgiving spirit of the people of Regina, and the practice by them of the principles of the Golden Rule, not to favor Edmonton as the second capital in the Territories, if two provinces are created.

—Wolsley News:—About 7:30 Sunday evening as a freight train was coming down the grade west of the town it broke in the middle and the back part ran into the forward part just at the west switch throwing down the embankment the tender of a dead engine, completely demolishing a car loaded with lumber and bursting another car of lumber, besides throwing others off the rails. Fortunately nobody was injured. Traffic was only delayed a short time, as the main line was soon cleared.

—Prince Albert Advocate:—The end of track on the Prince Albert section is now only 18 miles from the town; a large bridge across Mack's creek, some 3 miles east of Adam's ferry, is delaying track laying, but a week or so will see this finished, and steel will then be laid to the South Saskatchewan. It is understood that it is the company's intention to have all bridge material on the ground for an early start at the erection of the bridge as soon as spring opens.

## PERSONAL

R. A. Johnston went south this morning.

F. G. Rice went south yesterday.

# BIG SHIRT

Made big enough for a big man to work in with comfort. Has more material in it than any other brand of shirt in Canada. Made on the H.B.K. scale it requires 39 1/2 to 42 yards per dozen, whereas common shirts have only 32 to 33 yards.

That's the reason why the H.B.K. "Big" Shirt never chafes the armpits, is never tight at the neck or wristbands, is always loose, full and comfortable and wears well.

Each shirt bears a tiny book that tells the whole history of the "Big" Shirt, and also contains a notarial declaration that the H.B.K. "Big" Shirt contains 39 1/2 to 42 yards of material per dozen.

Sold at all dealers but only with this brand:—

## Reduction

Every Fancy and Fashion among them—the crisp one of Lustre, the soft Cashmere, French Flannel and Flannelette beauties, the smart Waists of Silk. But with all their charms we are going to clear them out this week at the big reduction of

25 PER CENT.

without an exception.

Make out your list and join the throng.

ANOTHER...  
SENSATION

The balance of our Ready-to-Wear SKIRTS we have determined to move off this week also at sweeping reductions. Take notice of the cut in prices given below.

	Regular	Sale Price
Black Skirts	\$2.50	\$1.95
Navy Blue and Black	4.00	3.35
" "	5.00	3.95
" "	6.50	5.15
Black and Fancy	7.50	5.75
Venetian Cloth	9.00	7.35
" "	10.00	7.95

And many other cuts just as deep.

Remember these cuts are only for this week and join the procession.
